Summary

Senior Software Engineer with 10+ years of experience designing and delivering enterprise applications, SaaS platforms, and government digital services using .NET and Angular. Strong background in software architecture, microservices, REST APIs, SQL Server/PostgreSQL, distributed systems, performance optimization, and end-to-end feature ownership. Nearly five years contributing to Upland Software's FileBound SaaS platform, alongside extensive experience delivering solutions for Saudi government entities and mentoring engineers.

Experience

Three Pillars

Cairo, Egypt

Senior Software Engineer

Feb 2024 – Jun 2025

- Led development of enterprise .NET and Angular solutions supporting digital-transformation initiatives for Saudi government entities, including the Ministry of Justice and SCEGA.
- Designed and developed scalable backend services and REST APIs using .NET / ASP.NET Core, microservices architecture, Entity Framework, and SQL Server.
- Contributed to architecture and technical-design decisions across distributed services, integrations, authentication, authorization, and data-access layers.
- Owned complex features end-to-end, from requirements analysis and technical design through implementation, testing, deployment, production support, and troubleshooting.
- Conducted code reviews, supported and mentored developers on technical challenges, and collaborated with product, QA, DevOps, and government stakeholders to deliver secure, maintainable, business-critical systems.

FlairsTech (Upland Software)

Remote, USA

Senior Software Engineer

Sep 2019 – Feb 2024

- Joined as the first FlairsTech engineer assigned to Upland Software's FileBound engagement and contributed as the engineering team expanded to approximately 15 developers.
- Served as a core engineer on FileBound, a mature SaaS platform for document management, workflow, forms, integrations, and business-process automation, for nearly five years.
- Designed, developed, and maintained enterprise features across .NET backend services, web applications, APIs, database components, and integrations.
- Owned features throughout their lifecycle, including technical analysis, implementation, code review, troubleshooting, optimization, maintenance, and production support.
- Collaborated with US-based engineering and product teams in a distributed Agile environment while evolving a long-lived enterprise codebase and balancing new features, technical debt, backward compatibility, performance, and reliability.

OrchTech

Giza, Egypt

Senior Software Engineer

Mar 2018 – Sep 2019

- Designed and developed enterprise web and backend solutions for clients including Total, Mobil, Sanofi, Fit & Fix, and Egypt's Holding Company for Water & Wastewater (HCWW).
- Built REST APIs, business services, database components, integrations, and web applications using the Microsoft .NET ecosystem and SQL Server.
- Developed backend services for government and commercial mobile applications and resolved application/database performance issues affecting production reliability and maintainability.

Matrix Business Solutions

Cairo, Egypt

Software Engineer

Sep 2016 – Mar 2018

- Developed enterprise HR and business-management applications using .NET and SQL Server, including employee management, attendance, payroll, authorization, reporting, and operational workflows.
- Developed Microsoft Dynamics AX customizations and integrations with internal business systems.

New Horizons CLC

Cairo, Egypt

Microsoft .NET Trainer

2016

- Delivered Microsoft technical training in C#, .NET, ASP.NET MVC, SQL Server, and web development to software engineers and professionals from private-sector and government organizations across the MENA region.

Selected Projects

Saudi Ministry of Justice – Government Digital Services

Designed and delivered enterprise services and application modules supporting digital government workflows and internal ministry operations.

Architecture / Tech: Microservices, .NET / ASP.NET Core, Angular, REST APIs, Entity Framework, SQL Server

SCEGA – Licensing & Event Management Platform

Contributed to the architecture and development of a government platform supporting licensing, event management, approvals, and complex business workflows.

Architecture / Tech: .NET / ASP.NET Core, Angular, REST APIs, Entity Framework, SQL Server

Upland FileBound – SaaS Process & Document Automation

Contributed for nearly five years to the development and evolution of a mature enterprise SaaS platform for document management, workflow automation, forms, integrations, and business-process automation.

Architecture / Tech: .NET, Web APIs, SQL Server, JavaScript, SaaS Architecture, Enterprise Integrations

HCWW – Government Mobile Services Backend

Developed backend APIs and integrations supporting digital mobile services for Egypt's Holding Company for Water & Wastewater.

Architecture / Tech: .NET, REST APIs, SQL Server, Backend Services, System Integrations

Mobil – Fuel Station POS Platform

Developed components of an enterprise point-of-sale platform supporting sales, inventory, receipts, operational workflows, and centralized reporting.

Architecture / Tech: .NET, SQL Server, REST APIs, Enterprise Web Applications

Technical Skills

Back-End: C#, .NET / ASP.NET Core, ASP.NET MVC, REST APIs, Entity Framework / EF Core, LINQ

Front-End: Angular, TypeScript, JavaScript, RxJS, NgRx, HTML5, CSS3

Data: Microsoft SQL Server, PostgreSQL

Architecture & Engineering: Software Architecture, Microservices, Distributed Systems, RESTful Services, Design Patterns, SOLID, OOP

DevOps & Delivery: Docker, Azure DevOps, CI/CD, Git

Testing: xUnit, NUnit, MSTest, Jasmine, Karma

AI-Augmented Development: Agentic coding workflows, AI coding agents, AI-assisted planning, refactoring, debugging, testing, code review, and technical documentation

Additional Technologies: Angular Material, PrimeNG, NG-ZORRO, Bootstrap, Tailwind CSS, Vue.js, jQuery, VB.NET, Agile/Scrum

Microsoft Certifications & Credentials

Microsoft Certified Trainer (MCT) | **Microsoft Certified Solutions Developer (MCSD)** | **MCSA: Web Applications**
Official Transcript: [Microsoft Learn](#)

Education

Benha University Sept 2008 – May 2013
Bachelor of Commerce – Accounting & Business Administration

Ministry of Communications and Information Technology (MCIT) Oct 2013 – Jun 2014
Diploma – Web Development & SharePoint

Languages

Arabic – Native **English** – Professional Working Proficiency **German** – Basic
